

## **ELECTRIC VEHICLE CHARGING POINTS – WHAT ARE YOUR VIEWS?**

The Parish Council will be considering the installation of Electric Vehicle charging points at Beighton Village Hall at its next meeting and would like to hear your views about this idea in advance of the meeting and before any decision is made. The installation costs would be partly covered by the Parish Partnership Scheme, which would pay for 50%, and there may be other financial support available too. Ongoing costs would need to be met directly by the Parish Council.

So that the Parish Council can gauge your views, please could you respond to the following points and / or add any additional comments:

- Do you think providing 2 x EV Charging Points is a good idea in Beighton?
- Do you think they would be used?
- Would you (or anyone you know) use them?
- Do you have an electric car?
- If you have an electric car already, would you be more likely to use a charging point at the Village Hall than charging at home?
- Would you wait with your car for it to charge or would you go home and come back?
- How often do you think you would use it?
- Would the availability of EV Charging Points at the Village Hall mean you would be more likely to buy an electric car?

All responses to the above points and / or any other comments you'd like to make regarding these should be emailed to the Parish Clerk at [beightonpc@outlook.com](mailto:beightonpc@outlook.com)

Many thanks,

Beighton PC.
